Single courses

BASIC SKIN SCIENCES

This course has been designed for beauty therapists, medical practitioners and nurses who require knowledge of skin science to conduct a skin consultation.

To be an efficient cosmetic practitioner, you must have a good understanding of basic cosmetic dermatology and be able to identify the appropriate treatment for your patient. This course is recommended as the perfect course to give you the knowledge you need as a cosmetic practitioner to begin your learning journey.

This short course is a prerequisite to a suite of short courses (both medical and specialty short courses).

Our Medical Cosmetics courses are delivered in conjunction with Cosmetic Institute of Australia and are available in bundles for specific professional needs.

Can I apply?

You must be a beauty therapist or medical professional.

This course is suited to:

- > Dentists
- > Nurses
- > Doctors
- > Beauty therapists

Course outcomes

By the end of this course, you will have the ability to conduct a skin consultation, identifying such things as:

- > skin anatomy
- > role of the skin
- > facial anatomy
- > skin ageing
- > melanogenesis
- > skin classification
- > pigmentation of skin
- > skin analysis and acne.

LASER SAFETY

This course will provide you with the knowledge to safeguard yourself and others in the workplace.

There are many uses for Intense Pulsed Light (IPL) or medical and cosmetic laser. Patients have individual needs and having the basic understanding of what different products are on the market can help you choose the most appropriate treatment for them. This course also explains laser/IPL safety and what should be practiced in the day-to-day safe handling of a laser or IPL machine.

In some states, this course is a requirement before you are able to work with lasers so please check the requirements of your state. This course will allow you to practice in Victoria, NSW, QLD, NT and WA and is a prerequisite for a suite of other short courses in the Beauty field.

Our Medical Cosmetics courses are delivered in conjunction with Cosmetic Institute of Australia and are available in bundles for specific professional needs.

Can I apply?

You must be a beauty therapy or a medical professional and have completed the Basic Skin Science course.

This course is suited to:

- > Dentists
- > Nurses
- > Doctors
- > Beauty therapists

Course outcomes

By the end of this short course, participants will have an understanding of:

- > physics and operation of lasers
- > medical applications of laser
- > brief guide to medical lasers
- > IPL vs laser
- > interaction of laser radiation with tissue
- > hazards of surgical lasers
- > laser clarification and hazard area
- > meets general Australian Safety Standards requirements.

INTENSE PULSED LIGHT

Learning about Intense Pulsed Light (IPL) in this course will give you the ability to treat multiple cosmetic concerns such as hair removal, pigments and vascular disorders. You will learn the strengths and limitations of IPL and how to use an IPL machine safely and efficiently.

Our Medical Cosmetics courses are delivered in conjunction with Cosmetic Institute of Australia and are available in bundles for specific professional needs.

Can I apply?

You must be a beauty therapy or a medical professional and have completed Basic Skin Science course.

This course is suited to:

- > Dentists
- > Nurses
- > Doctors
- > Beauty therapists

Course outcomes

By the end of this course, you will be able to:

- > understand the difference between lasers and IPL
- > identify the different uses of IPL for cosmetic skin conditions
- > describe the concept of IPL for hair removal and treatment of pigmentary and vascular disorders
- > safely identify clients suitable for IPL treatments.

LASER HAIR REDUCTION

Laser Hair Reduction is one of the most requested cosmetic procedures. In this course, you will learn how to make significant, high level, independent judgement in the consultation of patients.

Learn how to do this procedure and the selection of the appropriate machines suitable for a hair reduction treatment and be confident in your skills.

Our Medical Cosmetics courses are delivered in conjunction with Cosmetic Institute of Australia and are available in bundles for specific professional needs.

Can I apply?

You must be a beauty therapy or medical professional and have completed Basic Skin Science course.

This course is suited to:

- > Dentists
- > Nurses
- > Doctors
- > Beauty therapists

Course outcomes

By the end of this course, you will be able to:

- > understand the concept of laser hair removal
- > be familiar with different hair removal lasers available in the market
- > be able to perform a laser hair removal consultation and safely identify clients suitable for treatment.

NEUROTOXIN (ANTI-WRINKLE INJECTIONS)

This course will provide you with the knowledge to get you started on anti-wrinkle injections.

Heard of Botox? Botox is a brand of neuromodulator which has become synonymous with anti-wrinkle injections. However, there are other brands on the market and this course covers all the major brands of neuromodulators and how to use them safely for this common, routine procedure.

Our Medical Cosmetics courses are delivered in conjunction with Cosmetic Institute of Australia and are available in bundles for specific professional needs.

Can I apply?

You must have a medical background and be registered with Australian Health Practitioner Regulation Agency (AHPRA). And have completed the Basic Skin Sciences course.

This course is suited to:

- > Nurses
- > Doctors
- > Dentists

Course outcomes

Upon completion you will have an understanding of:

- > skin ageing and the facial anatomy
- > dynamic vs static wrinkles
- > types of neuromodulators
- > injecting neuromodulators
- > managing side effects.

DERMAL FILLERS

This course will provide you with knowledge about fillers and how to use them to 'fill' areas of the face which have lost their form, or simply to augment the face for an aesthetically pleasing effect.

Volume enhancement is greatly recognised for achieving a more youthful appearance. This course goes hand in hand with Neurotoxins (Anti-wrinkle Injections) to achieve a better cosmetic result for your patient.

Our Medical Cosmetics courses are delivered in conjunction with Cosmetic Institute of Australia and are available in bundles for specific professional needs.

Can I apply?

You must have a medical background and be registered with Australian Health Practitioner Regulation Agency (AHPRA). And have completed the Basic Skin Sciences course.

This course is suited to:

- > Nurses
- > Doctors
- > Dentists

Course outcomes

Upon completion you will have an understanding of:

- > how fillers work
- > filler selection
- > patient selection
- > injection techniques
- > basic treatment applications
 - > lips
 - > malar augmentation (cheek area).

PLATELET-RICH PLASMA THERAPY

Platelet-rich Plasma (PRP) is a cutting-edge treatment using your own blood to treat certain skin conditions and for hair regrowth. It is more commonly known as the 'Vampire Facial' following celebrity publicity. Learn what PRP is, how to prepare it in your rooms and how to use it effectively in the cosmetic field. This course is designed to provide a high level of proficiency in performing PRP injections.

Our Medical Cosmetics courses are delivered in conjunction with Cosmetic Institute of Australia and are available in bundles for specific professional needs.

Can I apply?

You must have a medical background and be registered with Australian Health Practitioner Regulation Agency (AHPRA). And have completed the Basic Skin Sciences course.

This course is suited to:

- > Nurses
- > Doctors
- > Dentists

Course outcomes

Upon completion you will have an understanding of:

- > PRP and its components
- > principles of wound healing
- > indications for PRP use
- > augmentation with PRP
- > PRP procedure, including photo-activation
- > complications and contraindications of PRP
- > evidence-based use of PRP..

COSMETIC THREADS – LEVEL 1

This is a course in using specially designed threads in a procedure called thread lift to achieve similar effects to a conventional surgical facelift but without the long recovery time and with fewer complications.

More and more people are choosing to do the thread lift method as it also involves minimal discomfort as well as being more cost effective in the long term. This minimally invasive technique involves inserting a thread under the skin to lift and pull the sagging skin to achieve a desirable youthful effect. Our specially designed Level 1 workshop is suited for experienced nurses who wish to carry out this procedure under the guidance of a cosmetic doctor/dentist as per current protocol.

Our Medical Cosmetics courses are delivered in partnership with Cosmetic Institute of Australia and are available in bundles for specific professional needs.

Can I apply?

You must have a medical background and be registered with Australian Health Practitioner Regulation Agency (AHPRA).

Suited to cosmetic medical practitioners

- > Dentists
- > Nurses
- > Doctors

Course outcomes

By the end of this course, you will be able to:

- > understand the concept of cosmetic threading
- > learn techniques to insert a thread under the skin to lift and pull the sagging skin to achieve a desirable youthful effect
- > be able to perform, consult and safely identify clients suitable for this treatment.

ADVANCED COSMETIC THREADS – LEVEL 2

This is a course in using specially designed threads for a thread lift procedure, which achieves similar effects to a conventional surgical facelift but with fewer complications and without the long recovery time.

More and more people are choosing to do the thread lift method as it involves minimal discomfort as well as being more cost effective in the long term. This minimally invasive technique involves inserting a thread under the skin to lift and pull the sagging skin to achieve a desirable youthful effect.

The level 2 workshop is for doctors/dentists wishing to learn about threads, covering both mono-threads as well as long threads.

Our Medical Cosmetics courses are delivered in partnership with Cosmetic Institute of Australia and are available in bundles for specific professional needs.

Can I apply?

You must have a medical background, be registered with Australian Health Practitioner Regulation Agency (AHPRA), and have completed Cosmetic Threads – Level 1.

This course is suited to:

- > Doctors
- > Dentists

Course outcomes

By the end of this course you will be able to:

- > understand the concepts of cosmetic threading
- > learn techniques that involve inserting a thread under the skin to lift and pull the sagging skin to achieve a desirable youthful effect
- > be able to perform, consult and safely identify clients suitable for this treatment
- > learn all about threads, covering monothreads as well as long threads.

Bundled courses

COSMETIC DENTAL PRACTITIONER BUNDLE

The Cosmetic Dental Practitioner bundle is designed for dentists wanting to perform cosmetic injections and gain additional knowledge and skills in skincare and laser to become a better rounded cosmetic practitioner.

This bundle consists of the following modules:

Basic Skin Sciences – Basic Skin Sciences form the basis of everything relating to cosmetic medicine. An efficient cosmetic practitioner needs a good understanding of basic cosmetic dermatology, which is covered in this module. It will teach you to identify the appropriate mode of patient treatment and we recommend all cosmetic practitioners begin with this module.

Laser Safety – There are many different uses for medical and cosmetic laser/IPL. Patients have individual needs so it is important to have a basic understanding of the treatment available to make an appropriate choice. More importantly, this module explains laser/IPL safety and safe handling practices for day to day use of a laser or IPL machine. This module also familiarises the learner with terminology and is the pre-requisite for all other laser modules.

Our Laser Safety Course is accredited and allows you to practice in Victoria, NSW, QLD, NT and WA.

Skin Care, Peels and Micro-needling – Skincare is an important cosmetic treatment and this module outlines simple and effective skin care that you can recommend and feel confident in using each product. The module also explains how to choose and perform different facial peels and the importance of LED therapy for treatment in certain skin conditions. Micro-needling is another up and coming cosmetic treatment and you will learn the basics of this treatment.

Neurotoxin (Anti-wrinkle injections) – Ever heard of Botox? Botox is a brand of neuromodulator that has become synonymous with anti-wrinkle injections. However, there are other anti-wrinkle brands on the market. This module looks at all the major neuromodulator brands and how to use them safely. It will also get you started on anti-wrinkle injections in commonly requested facial areas.

Dermal Fillers – Learn about fillers and how to use them to 'fill' areas of the face that have lost form or to augment the face for an aesthetically pleasing effect. This module complements the neuromodulator module to achieve better cosmetic results for patients.

Can I apply?

You must have a medical background and be registered with Australian Health Practitioner Regulation Agency (AHPRA).

Course outcomes

You will be able to conduct skin consultations, make recommendations for effective skin care to your clients, understand the cosmetic and medical applications of IPL and cosmetic lasers, be able to perform different facial peels, basic treatment applications and injections for neurotoxins and dermal fillers, and understand the basics of micro-needling.
